## Activities in Navigation

Marine Navigation and Safety of Sea Transportation

Edited by **Adam Weintrit**, Gdynia Maritime University, Poland  
Providing high-quality, scholarly research, addressing development, application and implications, in the field of maritime education, maritime safety management, maritime policy sciences, maritime industries, marine environment and energy technology. Contents include electronics, astronomy, mathematics, cartography, command and control, psychology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law. The book provides a forum for transportation researchers, engineers, navigators, ergonomists, and policy-makers with an interest in maritime researches.

5th Edition

## Admiralty Jurisdiction and Practice

Edited by **Nigel Meeson** and **John Kimbell**, Quadrant Chambers, UK  
*Series: Lloyd's Shipping Law Library*  
*Admiralty Jurisdiction and Practice* is the definitive work on litigation in the Admiralty Court. It provides unrivalled commentary and analysis of the key principles of admiralty law, from jurisdiction and procedure to forms and precedents, and is firmly established as the leading reference guide for today's maritime practitioner. The authors also deal with several topics not covered elsewhere, including the impact of insolvency, the interplay between jurisdiction and practice, limitation periods, the role of international conventions, and collision action rules.

## Advanced Marine Structures

Edited by **Srinivasan Chandrasekaran**, Indian Institute of Technology Madras, Adyar, Chennai, India

This book presents the various types and forms of marine structures and the functions and limitations of different offshore platforms, and describes their potential environmental loads. It discusses the ultimate load design, plastic design, shear center, and theories of failure, leading to a detailed understanding of plastic design and dynamics. It also explains the details of fluid-structure interaction as well as fracture and fatigue. It emphasizes basic concepts through simple illustrative examples and exercises, and explains design methodologies and guidelines through example structures.

## Air Cargo Insurance

Edited by **Malcolm A. Clarke**, St John's College, Cambridge, UK and **George Leloudas**, Swansea University

*Series: Maritime and Transport Law Library*

Approximately 40 per cent of value of international trade comes from goods carried by air, and the consequences of goods being damaged, destroyed or delayed can be serious, substantial, and perhaps unforeseen. This exciting new book is the only one on the market that deals exclusively with air cargo insurance, and will therefore, be a vital addition to the collection of any practitioner, professional or academic working in the field.

## Assessment, Evaluation, and Repair of Concrete, Steel, and Offshore Structures

Edited by **Mohamed Abdallah El-Reedy**

Due to age and increased loading on buildings, structural assessment and repair is routinely required with accuracy and professionalism. Our target is to have a building durable along its life time. The typical causes of structural failure and their mechanisms will be presented in this book for all types of structure, and further addressed by numerous case studies and engineering calculations. The up-to-date methods for evaluation and assessment the existing structure will be discussed. It will also examine different codes related to structural assessment and will present project management strategies from the feasibility stage through operations and maintenance.

Holder Rights and Liabilities

**Frank Stevens**

This book analyses the different theories that have been proposed to explain the position of the third-party holder of a bill of lading. It makes a distinction between contractual theories and non-contractual theories to explain the holder's position by building on the initial contract of carriage and applying contract law mechanisms and construing the position of the third-party holder independently. Having analyzed and appraised the different theories, it argues that the position of the third-party holder of the bill of lading is not obvious or self-evident; and submits that a statutory approach to the position of the holder of the bill of lading has advantages and would be preferable.

2nd Edition

**Bills of Lading**

**Richard Aikens**, Royal Courts of Justice, UK, **Richard Lord**, Brick Court Chambers, UK and **Michael Bools**, Brick Court Chambers, UK

*Series: Lloyd's Shipping Law Library*

Bills of Lading form an essential part of the carriage of goods by sea and international trade. Their multi-functional nature, together with the large volume of case law and regulation, make the law in this field as complex as it is commercially vital. This bestselling book provides a detailed analysis of the law and practice applicable to bills of lading before, during and after shipment, helping today's busy practitioner to quickly and easily find the information they need.

## Charterparties

Indemnities, Recourse and Collaterals

Edited by **Filippo Lorenzon**, University of Southampton, UK

At a time of great volatility in the shipping market, indemnities, guarantees and recourse actions are becoming increasingly common issues. Although the commercial purpose of such devices is rather straightforward, their enforcement gives rise to a number of complex legal issues spanning from jurisdiction and conflict of law to equitable devices. With the aim of unravelling these complexities, this book examines a number of crucial issues, including the master to sign bills of lading as presented; bailment and general principles of indemnity and contribution under the general maritime law of the United States.

## Delivery of Goods under Bills of Lading

**Anders Møllmann**, University of Copenhagen, Denmark

This book first analyses the "presentation rule", its finer contents and its legal basis. It then analyses three developments and responses to the problems that the bill of lading system gives rise to in practice. The commercial response consists of contractual exemption or limitation clauses in the bill of lading set up as a defence against claims for misdelivery. The international legislature's response denotes the adoption of the Rotterdam Rules. Finally, the technological response denotes the possibility of using electronic bills of lading. The analyses include a comparative approach examining both English and Scandinavian law to elucidate the issues with greater clarity.

## Developments in Maritime Transportation and Harvesting of Sea Resources (2-Volume set)

Proceedings of the 17th International Congress of the International Maritime Association of the Mediterranean (IMAM 2017), October 9-11, 2017, Lisbon, Portugal

Edited by **Carlos Guedes Soares**, Technical University of Lisbon, Lisbon, Portugal and **Ângelo P. Teixeira**

The IMAM Congress is a forum organised by the maritime technical community of the Mediterranean, attended by qualified representatives from the academic and professional sectors worldwide. Although the initial Congresses have focussed on areas in and around the Mediterranean, IMAM Conferences have, in the recent past, been international events dealing with problems of interest to the industrial sector globally. The conference welcomes the participation of all professionals worldwide who are active in fields related to Maritime Transportation and Harvesting of Sea Resources, involved or interested in the development of any of the thematic areas covered by the Congress.

3rd Edition - NEW EDITION

## EU Shipping Law

**Vincent Power**, A&L Goodbody, IRE

*Series: Lloyd's Shipping Law Library*

This third edition has been completely revised to include recent developments, and features extensive appendices on council decisions, resolutions and recommendations.

A reference work for professionals who are under pressure to provide advice to clients on how EU law effects their business and how to avoid the pitfalls and take advantage of the extended market in any European transaction. Twenty-six chapters cover aspects of EU shipping law in detail and the author takes a commercial as well as a legal perspective throughout. Chapters included cover EC marine environmental law and marine

insurance law - freedom of establishment and freedom to provide shipping services in the EU.

## Fixed Offshore Platforms: Structural Design for Fire Resistance

Mavis Sika Okyere, Ghana National Gas Company Ltd. Accra, Ghana

This book examines the fire-resistant design of fixed offshore platforms. Fire-based structural design of a fixed platform requires designing the platform to maintain the integrity of its safety features and functions for a minimum-required performance time when subjected to fire and/or explosion damage. The book describes the required loading, load combinations, strength and stability checks for structural elements under compression. It also explains how tubular joints are designed with regard to punching, fatigue analysis, dynamic analysis, and impact analysis. It also explains how to assess structures for fire endurance, and the overall general safety of fixed platforms.

## Handbook of Oil and Gas Piping

a Practical and Comprehensive Guide

Murali Sambasivan, Taylor's University Lakeside Campus, Subang Jaya, Malaysia and Sekar Gopal, Muhibbbah Engineering (M) Bhd, Klang, Malaysia

This comprehensive guide to oil and gas piping brings together the practical and contemporary aspects of the field – providing the technical and management information that can be used readily in real time projects. It covers the stages from the raw material to project completion to handover and beyond, provides practical guidelines to oil and gas piping contractors to train their project management staff to follow the best practices in the oil and gas industry, emphasizes on hard and soft factors to achieve the desired project performance and highlights the roles of ISO management systems.

## Illegality in Marine Insurance Law

Feng Wang

Series: *Contemporary Commercial Law*

Illegality in Marine Insurance Law is the first book to deal specifically with illegality in the context of marine insurance law. Previously, this issue has only ever been partially covered within analysis and criticism of Section 41 of the Marine Insurance Act 1906 and warranties. However, Dr Wang Feng goes much further than this by considering its impact on the common law relevant to marine insurance in many jurisdictions worldwide. Of interest to academic researchers and practitioners in common law and civil law jurisdictions, this book is a unique and comprehensive guide to illegality in marine insurance law.

## The Impact of Joint Ventures on Bidding for Offshore Oil

John Douglass Klein

Series: *Routledge Library Editions: Energy Economics*

This volume, originally published in 1983 investigates joint venture participants in outer continental shelf sales from institutional, theoretical and statistical points of view. It includes a section on the 1975 joint bidding ban, which reviews the principal study which led to the ban and several which are critical of it. The study of offshore leasing sales goes far beyond the field of economics and this volume will therefore be of interest to those in geology and geophysics, finance, law, politics and statistics.

## Insurance Law Implications of Delay in Maritime Transport

Aysegül Bugra

Series: *Contemporary Commercial Law*

Delay in a marine adventure is an important and frequent phenomenon of maritime transport as it affects various parties and their interests. *Insurance Law Implications of Delay in Maritime Transport* is the first single book to deal specifically with this issue in the context of insurance law. The book addresses the losses and expenses that may arise from delay or loss of time in maritime transport, the types of insurance available covering or excluding losses arising from it, and the impact of delay on voyage policies.

## International Marine Environmental Law and Policy

Edited by **Daud Hassan**, School of Law, University of Western Australia and **Saiful Karim**, Queensland University of Technology, Australia

*Contemporary Marine Environment Law and Policy* presents a thorough appraisal of the main issues, actors and institutions engaged in the legal aspects of marine environmental conservation.

With contributions from an international range of respected figures, this volume provides a concise account of the legal and policy framework underlying international marine environmental issues, and of the fundamental concepts and strategies that are important to the protection of the marine environment.

This work provides a solid foundation for students and others interested seeking to gain an understanding of this hugely important subject.

## The ISM Code: A Practical Guide to the Legal and Insurance Implications

**Phil Anderson**

*Series: Lloyd's Practical Shipping Guides*

This book provides practitioners with a practical overview of, and much needed guidance on, the potential implications of failing to implement the requirements code. It will be hugely valuable to DPAs, managers of ship operating companies, ship masters, maritime lawyers and insurance claims staff.

## The Law of Wreck

Nicholas Gaskell, TC Beirne School of Law, University of Queensland, Australia and  
Craig Forrest, TC Beirne School of Law, University of Queensland, Australia

*Series: Maritime and Transport Law Library*

This book covers wreck law as an integrated whole, going beyond the question of "removal" and includes matters such as the ownership of wreck and how legal systems have dealt with private law rights after ships have been wrecked. It provides authoritative guidance on the genesis and meaning of the Nairobi Convention, as it applies both to States trying to use its powers and to shipowners and liability insurers faced by its provisions.

## Lloyd's Maritime Atlas of World Ports and Shipping Places 2018-2019

Edited by Informa UK Ltd

Published since 1951, Lloyd's Maritime Atlas is the oldest and most respected atlas in the shipping industry. It provides a comprehensive reference for locating the world's ports and shipping places, including major canal and river systems in addition to all of the main road, rail and airport connections. Commercial ports are covered in a clear and concise manner, focusing on the world's busiest trading routes. In addition, the atlas features world and regional marine distance tables, a comprehensive user guide, and detailed statistics on commercial vessel movements, characteristics and casualties.

**Maritime Law**

Edited by **Yvonne Baatz**, Institute of Maritime Law, University of Southampton, UK

*Series: Maritime and Transport Law Library*

Now in its fourth edition, this authoritative guide covers all of the core aspects of maritime law in one distinct volume. *Maritime Law* is written by a team of leading academics and practitioners, each expert in their own field. Together, they provide clear, concise and fully up-to-date coverage of topics ranging from bills of lading to arrest of ships, all written in an accessible and engaging style. As English law is heavily relied on throughout the maritime world, this book is grounded in English law whilst continuing to analyse the key international conventions currently

in force.

## Maritime Order and the Law in East Asia

Edited by **Nong Hong** and **Gordon Houlden**

This edited volume evaluates the role of United Nations Convention on the Law of the Sea (UNCLOS) in managing maritime order in East Asia after its ratification in 1994, while reflecting upon various interpretations of UNCLOS. Providing an overview of the key maritime disputes occurring in the Asia Pacific, it examines case studies from a selection of representative countries to consider the how these conflicts of interest reflect their national interests, and the wider issues that these interpretations have created in relation to navigation regimes, maritime entitlement, boundary delimitation and dispute settlement.

3rd Edition

## Merchant Shipping Legislation

**Aengus R M Fogarty**

*Series: Lloyd's Shipping Law Library*

Now in its third edition, *Merchant Shipping Legislation* is a useful tool for those wishing to refer to the UK and Commonwealth merchant shipping statutes. Organized in subject areas and regularly updated, this complete annotation and commentary on the UK and Commonwealth merchant shipping legislation will be of use to the work of maritime lawyers in the UK and overseas. All the provisions of the various merchant shipping acts are contained in a single easy-to-use volume organized in subject areas.

Divided into twenty chapters, the work addresses all the most

important areas including: registration; collisions; salvage; pilotage; environmental protection; oil pollution and carriage of goods.

## Offshore Construction

Law and Practice

**Stuart Beadnall**, Stephenson Harwood and **Simon Moore**, Stephenson Harwood

*Series: Lloyd's Shipping Law Library*

With thirty per cent of the world's oil and gas production coming from offshore areas, the construction of specialist vessels to perform offshore operations is a crucial part of the industry. However, with exploration and production being performed in increasingly exacting locations, the scope for disputes arising from cost overruns, scheduling delays and technical difficulties is immense. This book covers the entire construction process from initial concept right through to installation, at each stage commenting on typical contract terms and offering expert advice

based on real-life examples.

## Offshore Energy and Marine Spatial Planning

Edited by **Katherine L. Yates**, Flinders University, Australia and **Corey J. A. Bradshaw**, University of Adelaide, Australia  
*Series: Earthscan Oceans*

Offshore energy generation is a rapidly growing sector, competing for space in an already busy seascape. This book brings together the ecological, economic and social implications of the spatial conflict this growth entails. Covering all energy-generation types (wind, wave, tidal, oil, and gas), it explores the direct and indirect impacts the growth of offshore energy generation has on both the marine environment and the existing uses of marine space.

## Offshore Wind Turbines and Wave Energy Converters

Numerical and Physical Modelling

**Constantine Michailides**, Liverpool John Moores University, Liverpool, Merseyside, United Kingdom

The efficient harnessing of offshore energy resources can significantly contribute to meeting the growing worldwide demand for energy. Offshore wind turbines (OWTs) have been commercially deployed in numerous offshore sites and wind farms. Wave energy converters (WECs) are a new, promising source of alternative clean energy, with significant benefits as compared to other forms of renewable energy. This book explains the development of numerical and physical models for these energy systems, and examines their functionality and structural integrity in both standalone and farm configurations. It will also provide design guides, theoretical principles, and engineering and MATLAB® examples.

## Progress in Maritime Technology and Engineering

Proceedings of the 4th International Conference on Maritime Technology and Engineering (MARTECH 2018), May 7-9, 2018, Lisbon, Portugal

Edited by **Carlos Guedes Soares**, Technical University of Lisbon, Lisbon, Portugal and **T.A. Santos**, Ordem dos Engenheiros, Lisbon, Portugal

This proceedings volume is a collection of papers presented at the 4th International Conference on Maritime Technology and Engineering. The papers come from an international group of authors focused on different subjects in a variety of fields:

Maritime Transportation, Energy Efficiency, Ships in Ports, Ship Hydrodynamics, Ship Structures, Ship Design, Ship Machinery, Shipyard Technology, Safety & Reliability, Fisheries, Oil & Gas, Marine Environment, Renewable Energy and Coastal Structures.

This work will appeal to academics, engineers and professionals interested or involved in these fields.

## Progress in the Analysis and Design of Marine Structures

Proceedings of the 6th International Conference on Marine Structures (MARSTRUCT 2017), May 8-10, 2017, Lisbon, Portugal

Edited by **Carlos Guedes Soares**, Technical University of Lisbon, Lisbon, Portugal and **Y. Garbatov**, Technical University of Lisbon, Portugal

This collection of the papers from the 6th International Conference on Marine Structures (MARSTRUCT 2017) presents recent research and advancements in the analysis and design of marine structures, in order to explore the full range of methods and modeling procedures for the structural assessment of marine structures. The practical application of these methodologies to real structures is also emphasized.

## Safety of Marine Transport

Marine Navigation and Safety of Sea Transportation

Edited by **Adam Weinrit**, Gdynia Maritime University, Poland and **Tomasz Neumann**, Gdynia Maritime University, Gdynia, Poland

Providing high-quality, scholarly research, addressing development, application and implications, in the field of maritime education, maritime safety management, maritime policy sciences, maritime industries, marine environment and energy technology. Contents include electronics, astronomy, mathematics, cartography, command and control, psychology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law. The book provides a forum for transportation

researchers, engineers, navigators, ergonomists, and policy-makers with an interest in maritime researches.

## The Seamanship Examiner

For STCW Certification Examinations

**David House**, previously a lecturer at Fleetwood Nautical College, UK and **Farhan Saeed**, Senior Lecturer in Maritime Operations in Liverpool John Moores University, UK

Since publication of the first edition, there have been many new innovations throughout the industry. This guide is fully updated to reflect these changes and includes practice questions on International Safety Management (ISM), Electronic Chart Display and Information Systems (ECDIS) and the International Code for the Security of Ships and Port Facilities (ISPS), as well as hundreds of additional tutorial questions throughout the book and the accompanying interactive CD. Fully updated with the latest amendments to the COLREGs this is a trusted study aid for all international STCW Deck Officer candidates.

## Ship Building, Sale and Finance

Edited by **Baris Soyer**, Institute of International Shipping and Trade Law, University of Wales, Swansea, UK and **Andrew Tettenborn**, Institute of International Shipping and Trade Law, University of Swansea

*Series: Maritime and Transport Law Library*

Written by a team of acclaimed practitioners and leading academics, this book brings together in one single volume an analysis of contemporary legal issues concerning ship building, sale and finance contracts. It offers a comprehensive, expert and thoroughly practical guide on what is a very complex area of law in today's international shipping industry.

## Ship Registration: Law and Practice

Edward Watt and Richard Coles

*Series: Lloyd's Shipping Law Library*

*Ship Registration Law and Practice* is fully updated and now entering its third edition. Part of Lloyd's Shipping Law Library, it is the most authoritative guide to the theory and practice of ship registration in the most popular jurisdictions. It contains the reference material needed to submit a vessel for registration at the leading ship registries world-wide, as well as extracts from key international conventions in this area, a new statistical analysis of the world merchant fleet and Port State control rankings.

## Shipbreaking in Developing Countries

A Requiem for Environmental Justice from the Perspective of Bangladesh

**Md Saiful Karim**, Queensland University of Technology, Australia

*Series: IMLI Studies in International Maritime Law*

Sitting at the intersection of three distinct fields—environmental justice, international environmental law and international maritime law—this book offers an innovative take on the issues surrounding the shipbreaking process. Drawing on the case-study of Bangladesh due to the problematic nature of its shipbreaking industry, the author implements an environmental justice framework to examine the issues of sustainability surrounding shipbreaking.

## Shipbroking and Chartering Practice

Evi Plomaritou and Anthony Papadopoulos

*Series: Lloyd's Practical Shipping Guides*

Now in its eighth edition, this classic text is a first point of reference for anyone looking to obtain an understanding of chartering and shipbroking practice. It provides hands-on, commercially-focused explanations of chartering business and invaluable advice on how the shipping market operates across a broad range of topics. The authors also deal expertly with the legal, financial, operational and managerial aspects of chartering, offering numerous case studies which clearly link theory to practice.

6th Edition • TEXTBOOK • READER

## Shipping Law

Simon Baughen, Swansea University, UK

In this well-established textbook, Simon Baughen expertly covers the whole spectrum of English shipping law, placing the highly specialised rules of shipping in a commercial context and relating them to the general principles of English contract and tort law. Students new to Shipping Law or from non-law backgrounds will find the accessible narrative particularly helpful, while the comprehensive overview of topics will ensure that the book is ably suited to course use.

Fully updated throughout, this sixth edition provides an invaluable source of reference and will be of use to both students and to those in practice.

## Ships and Offshore Structures XIX

Edited by **Carlos Guedes Soares**, Centre for Marine Technology and Engineering (CENTEC), Technical University of Lisbon, Portugal and **Y. Garbatov**, Technical University of Lisbon, Portugal

This three-volume work presents the proceedings from the 19th International Ship and Offshore Structures Congress (Cascais, Portugal, 7-10 September 2015), a forum for experts in marine structural research. The topics covered include ships and other marine structures used for transportation, exploration, and exploitation of resources in and under the oceans.

## Structural Building Design

Wind and Flood Loads

Syed Mehdi Ashraf

This book will cover the latest methods for the structural design to mitigate potential damage due to high-speed winds, storm surges, tornadoes, and inland flooding (all of which could be brought on by hurricane conditions). It will provide detailed explanations of the new ASCE 7-16 standard (to be released in March of 2017) which deals with designing buildings to withstand loads, including wind, snow, earthquakes, etc. Unique to this book is added coverage of ASCE 24-14, which regulates flood-resistant design of structures. It will provide numerous design examples throughout. It will also examine the processes involved in material selection to comply with the latest codes and standards.

## Third Parties' Rights and Liabilities under Bills of Lading

Edited by **Filippo Lorenzon**, University of Southampton, UK

As transport speed increases and global trade intensifies, contracts for the carriage of goods and attendant relationships are becoming ever more complex. This timely publication brings together expert contributions from around the globe, looking both at the theoretical background of the bill of lading as well as its application in practice today. With third party involvement at an all-time high, this text also discusses the difficult question of third party rights and liabilities under a number of different jurisdictions. Covering English, US and EU law, this work provides a comparative and authoritative source of information for maritime lawyers worldwide.

3rd Edition

## Warranties in Marine Insurance

Baris Soyer

The third edition is brought up to date with significant discussion of recent case law with a view to identifying their impact on established legal principles. The book further develops the chapter on the interpretation of express warranties. Developments to the interpretation of marine and commercial insurance contracts are analysed, and the book considers the dividing line between express warranties and similar terms such as suspensory provisions which have been further complicated in recent judgments.
